

YOUR TREATMENT SUMMARY

- Your nurse case manager will bring you pills every day.
- Your nurse case manager will visit you once a month to see how you are doing. We may ask you to cough sputum in the tube once a month.
- Your community health worker or nurse case manager will pick up the tubes.
- We will ask you to get another chest x-ray in two months.
- We will work with your doctor to provide you the care you need.
- You may need blood tests if you have a problem or just to make sure the pills are not causing a problem.
- You can call your nurse case manager if you have a question or problem.
